

CARNIVEROUS PITCHER PLANTS (20 USD)

Location **Hawaii**
<https://www.genclassifieds.com/x-280434-z>

Spooky bug eating plants, \$20.00 each. These plants have pitchers that grow off the tips of their leaves. Bugs are attracted to the fluid in the bottom of the pitcher and crawl in where they are trapped and dissolve. Then the fluid bug juice is drawn up to the leaf and nourishes the plant. But the best part is how beautiful the pitchers are, and the large number of different designs and shapes. They don't need a lot of special care. Don't let them dry out, and avoid direct sun all day. CREEPY YA. The greenhouse is at 70 W. Kuiaha Rd. just off Hana Hwy. at mile marker 12.5. Open Tues. through Sat. from 10-3pm. or call me if you can't make those.
