Mac OS

Location **Massachusetts**
https://www.genclassifieds.com/x-280806-z

We have a MacOS application and are looking for a New England area developer who can help add new features and maintain the application over time. Tasks are relatively small and can be easily handled within a few hours or a few days, depending on the project.

We don't require on-site presence. You can easily get the work done remotely, nights and weekends, wherever it's convenient for you.

Please send a reply with some information about your background. All responses are.
