TwistFamilyMotors.com - Subaru Repairs and Service -- Head Gasket Replacements, Timing Belt Replacements and More. Quality and Professional Service at Reasonable Prices. Our owner and two technicians have a total of 50+ years of automotive experience and lately we have been averaging more than one Subaru head gasket project each week. We do things the right way -- by pulling the engine out of the car and replacing the head gaskets and other related parts before reinstalling it. We do not try to cut corners and "save" time by trying to do the job with the engine in the car. Once a job is scheduled, we usually can complete it within two work days.

In our experience, the best way to do a head gasket job is to replace the head gaskets, timing belt, valve cover gaskets, thermostat and install a remanufactured water pump at the same time. We can offer this special for 2.5-liter four-cylinder Subaru engines at \$975 including parts and labor. If needed, there is an additional charge for new head bolts, tensioner pulleys, machine shop work and other parts. Normally, these items are not needed though.

Rust repair and light body work is also available. If you have rust holes in your door jambs or quarter panels, we can likely fix that. Stop on by for a free estimate.

We also sell pre-owned Subarus that are hand picked and serviced. We specialize pre-2004 Outbacks and Legacy Wagons. You can view our inventory complete with detailed condition reports and photo galleries at TwistFamilyMotors.com.
