You probably think that the only way to play the lottery is by purchasing tickets at a retailer, like 7-Eleven. And outside of what you are about to see, that is true.

The people besides ticket winners who actually make money in the lottery are the government or state agencies that sell the tickets and the beneficiaries of the proceeds from sales (like state education).

Retailers make a tiny percentage of sales, not enough to survive on if that's all they sold.

But what if you could "squeeze your way" in between and be a "middle person" on the transactions of thousands of lottery tickets, and get paid for your services?

Better yet, what if you could also get a percentage of all winnings on tickets you are a "middle person" for?

There are plenty of systems available today to try and increase odds in the lottery. People spend money on all sorts of techniques that do very little to increase odds. Things like analyzing hot numbers or histories, wheeling systems, and more.

The number one way to increase odds in any lottery drawing is to purchase more tickets, and that's something most of these systems will have you doing anyway.

Traditionally, lottery pools win most jackpots. The reason why is they have more buying power, so they are able to purchase more tickets. One of the largest Powerball jackpots, over \$300 million dollars, was won by workers at the ConAgra Food Plant. A group of workers got together, pooled their money, bought tickets, and split the proceeds amongst the pool members.

However, lottery pools have a tremendous downside.

As the size of the pool increases, the initial percentage of the proceeds decreases proportionally.

For example, if you were in a lottery pool with 100 people, and you bought 10 tickets, you would get 10 percent of the proceeds. If you were in a pool with 1000 people, you would get one percent. Eventually, it would reach a point where you wouldn't want to bother being in the pool because even though odds would be much better playing on many more tickets, your actual proceeds would be slim.

Lotto Magic changes all of that.
