## Professional female needs help wtransferring contacts to computer (Downtown Burlin

Location Vermont https://www.genclassifieds.com/x-283759-z

Professional young female needs help ASAP with a bunch of random computer technical stuff! I have an Android Galaxy S4 and Mac Pro. I need help getting my contacts backed up from the phone to "google" so I can edit them via the computer. I imagine this will only take about 30 minutes.

Another project I need help with is getting VMWare or Parellels on my Mac. I have Windows 7 already, and just need the virtual box set up. If you have Parallels, great! I'm guessing this will take 2 hours??

If you can help me with either of these, please text me at eight zero two nine two two six six zero nine. 802-922- six six zero nine. Thank you!!!
