I'm in the process of teaching myself Swift & iOS development but feel I would benefit from actually sitting down with someone who can show me the ropes. Online tutorials can only go so far and I've been having trouble finding more in depth Swift tutorials beyond the simple starter ones out there.

Ideally, you can sit down with me and help me construct a basic app. If the first session goes well, I'd be interested in taking these new skills and growing them independently, then linking back up after a week or two of independent work and have you answer questions of mine and help me further progress, and so on. Essentially, I'm looking for a tutor!

If this sounds like something you would be interested in, please reach out with your availability and cost, as well as a summary of your experience with iOS.

Looking forward to hearing from!
