

Black Lab (Rogers)

Location **Arkansas** https://www.genclassifieds.com/x-284353-z

I've got a female black lab that I've had for 6 years or so. She's had her shots and been spay. She is a very loving and smart dog. We use to live on a farm but we sold it and moved to town. She needs to be out like that. I will give her a good family. She likes to be outside but won't mess in the house if left in.
