I have a website I want redesigned. It's a very simple site, but I'm not happy with the current look. I feel like an experienced web designer can do something much better in 1 or 2 hours. As such, that's the amount of time I expect to pay for. You might have to fix some images but that's about it. No backend, just text and colors and a layout. Bonus points if you know how to monetize a site through ads!

Individuals only, no businesses. Prefer
