Herbal skin care is good not only for the routine nourishing of skin but also for treatment of skin disorders like eczema and psorasis. Most herbal skin care products don't have any side effects (the most important reason for preferring them over synthetic products) Moreover, herbal skin care products can be easily made at home, hence making them even more attractive. So, herbal skin care is the way to go. However, this does not mean that you totally discard the synthetic products. Some people go to the extent of debating with their dermatologist, if he/she suggests a synthetic product. You should accept the fact that some skin orders might need usage of clinically proven non-herbal skin care products.
