I am selling my Hamer Pacer PAC3 guitar with a First act amp, tuner, and Guitar Bible. I bought everything back in 2011 because I wanted to learn how to play, but I never got the time so it just sat. The guitar was around 175 and the amp was 30. The Guitar Bible comes with a guitar facts book with information on numerous guitars and players. It also comes with an interactive dvd and a teaching book with almost every type of music to play. It does have a bridge that can hold a whammy bar but I lost it. Everything works great and what you see is what comes with it. Feel free to text or email any time. I don't answer.
