Searching for artists that want to write and record their original music. I am a producer/musician looking to write, record and collaborate with artists with a strong attitude and work ethic. These days it is important to have a DIY attitude in music, and to network with people who have similar interests. I am familiar with a variety of styles, Reggae, Rock, Hip-Hop, EDM, etc. I have worked as a session musician, have experience engineering with Logic and Pro-Tools, worked as a DJ and studied music theory and music business in school. If you are interested e-mail me and we can discuss.
