I have three sealed in box never opened vintage lego promotional sets that were a shell gas station promotional item. Very tough to find and I have never seen these before.

Great for a lego collector.

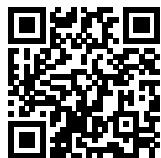

Set numbers on boxes are 2537, 2540, 2538. Looks like they might be part of lego town or lego castle. One minifigure has a costume on his head that loks like a bat and I am not sure what this minifig is part of but would look neat with monster fighter logos.

\$40 cash for all three
