

# Lego Eiffel Tower 10181 (southgate)

Location **Kentucky**  
<https://www.genclassifieds.com/x-315217-z>

Here is your chance to own a very rare architecture legos set! This set is the tallest lego ever made in a set and is about four feet tall when built. Have all three instruction book manuals but no box. I was told it is complete but not sure as I have not sorted through the 3500 pieces! The other sets we bought from this same person we built and they were all complete.

Rare set that is 1:300 scale of the original in France made from the original blueprints.

\$650 cash

If you see this ad it is still.
