This is a vintage playset with two action figures. Has original box and instructions. Set is the bionic transport and repair station. Box not in great shape. One figure you can look through his eye and the other one has bionicle parts like a robot. I was told this is an old GI Joe Atomic Man Mike Powers figure. Neat for a collector or from your childhood. Been in the attic for years.

If you collect action figures like star wars, gi joe, barbie dolls, etc. then this is for you!
