4 month old pair of lovebirds, same clutch. One appears male the other female. Their parents our green, orange and yellow, but these guys mutated blue, gray. the pics don't do them justice. Ones friendlier then the other but I will keep working with her. The other is a 7 month old parrotlet dilute blue sexed Male, shows good parenting skills. To many birds, son moved out and forgot to take the birds with him and I don't have enough time to keep them socialized. Please do your homework before becoming a feather friend. They our fun loving animals that need simulation. Rehoming fee applies to ensure good.
