

Toyota Camry RH New CV Axle (25 USD)

Location

Idaho

<https://www.genclassifieds.com/x-315673-z>

I have this brand-new, in-the-box passenger-side CV axle shaft for Toyota Camry 4-cylinder models, which I believe will fit up to 1991 before they changed the body and chassis. It is the 2-piece style, with the long solid shaft that slides into the transmission. I think it will fit automatic or standard transmissions, but we can match it up to make sure. It is Mevotech brand, part number CVN8638, and was originally \$120. Installation is available, and I can also take a credit card with an added service charge.

Call, e-mail, or text 921-0909. Thank!
