

NEW BATHROOM SUBFLOORS and FINISH FLOORS (Manchester)

Location **New Hampshire**
<https://www.genclassifieds.com/x-315880-z>

*Are your bathroom "Wall / Floor Tiles" falling off one at a time?

*Is the floor next to the tub / shower feel "Soft" when you step on it?

*Are linoleum or square vinyl / tiles "Curling Up"?

*Is there black and Green Mold / Mildew Forming around the corners of your tub or shower?

*Do you feel embarrassed to have friends or relatives use your tub or shower if they stay over for a visit and you just want to close the door and hide it?

*You've been saying that someday you would fix the problem but never got to it and kept putting it off ?

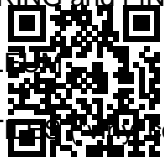

*And did you know that the longer you put it off and continue using your tub and shower it could be doing more damage than you think, such as a continuous water pipe leak, water saturated rotten plywood on floors that don't dry out, possible structural framework damage that would have to be replaced, not including your down stairs level with ceiling and walls?

*In order to replace the "Rotten Subfloor" in a bathroom, the sink / vanity, toilet and existing plywood flooring along with VCT / linoleum or ceramic tiles would have to be removed to install new tongue and groove plywood for maximum strength with liquid nails and 3" coarse screws (prevents floor squeaks). Walls would be repaired / rebuilt structurally if needed. Then finish off with new VCT, linoleum, ceramic or porcelain tiles (floor / walls).

My name is Joe Petralia and have been in the construction business for 40 years. I hold a Registered NH Business Trade Name with lots of "Excellent References". I am "Fully Insured" and work alone with "One Job at a Time". I have installed, replaced and repaired many bathroom / kitchen interior "Floors and Walls" and work directly with my customers from start to finish. I am "highly qualified" in replacing: subfloors, walls and various structural frame work. Installation of : various types of floor underlayment's and wall boards such as: fiberglass sheetrock, purple sheetrock and green board sheetrock on walls (moisture boards) in areas of water condensation which are mold and mildew resistance to name a few including a variety of finish flooring. *IMPORTANT !!! Please leave your: TOWN, PHONE # and a BRIEF DESCRIPTION of your bathroom / kitchen project and any questions you may have by E-MAIL.

Thank you for your time. . . . look forward to hearing from you. . . . Joe
