

Jazzmaster Custom Build Vintage Specs (1100 USD)

Location **New York**
<https://www.genclassifieds.com/x-315921-z>

This is a recently finished Jazzmaster build in near perfect condition (the pick guard has some scratches - everything else is in MINT condition). The color is Charcoal Frost, which Fender introduced in limited numbers in the mid 60's. Gives the guitar a unique look as this color can only be found these days as auto touch up paint. The body and neck are Warmoth. The neck meets early sixties specs and was built to order (8 week wait time).

25.5" scale
7.25" radius
1 5/8" nut

The pick guard is Fender licenced. As you may know, normal Fender Jazzmaster pick guards don't line up perfectly on Warmoth bodies. The appropriate mods have been made to the routing so it does fit, in case you wanted to swap out another pick guard someday or install a vintage one, you won't be limited to Warmoth's selection!

The pickups are Seymour Duncan Antiquities, same ones used by Nels Cline and J. Mascis in their vintage jazzmasters.

It has a the Mustang style bridge.

It's just been setup and is 100% ready.
