Greetings everyone,

I am pursuing a Master's degree in Clinical Psychology and I have made a survey to investigate Posttraumatic Stress Disorder (PTSD) in relation to personality traits and verbal memory.

The survey should take between 7 - 15 minutes to complete.

Participating is voluntary and confidential and will help us to understand the associations between PTSD and personality traits, as well as PTSD and verbal memory.

This is the survey link: <http://www.surveygizmo.com/s3/1966753/memory-personality-ptsd>

Thank you in advance,
