Location **New York** https://www.genclassifieds.com/x-316531-z

- => You'll learn what you need to become a good bass player in as short a time as possible. Just some of the subjects we'll cover are:
- + THEORY: (the notes in common and exotic scales, which notes are in what chords, how notes and chords interact to create a bassline, and much more).
- + TECHNIQUE: (I'll give you fingering exercises to build up your "chops" as quickly and easily as possible).
- + HOW TO CREATE YOUR OWN BASSLINES: (how to use chord patterns and blues patterns, how to create a bassline that will make a song better and avoid what will not).
- + HOW TO PLAY ALONG WITH A DRUMMER: (everything you play must "groove" with the drummer. I'll help you develop your sense of rhythm so this will be much easier for you to do).
- + EAR TRAINING: (learn how to copy what you hear off your favorite CD'S, how to improvise and understand the theory behind your favorite basslines).
- + READING: (how key signatures work, notes on the music staff, value of each note, and much more).
- => My teaching methods are unique, and I guarantee you'll improve quickly, no matter how long you've been playing. All lessons are geared to the type of music you like to play, but what you learn can be applied to any style of music.
- => I have reasonable rates and a flexible schedule. I'm very patient, and do my best to teach in an enjoyable, no pressure way. I have extensive experience teaching teenagers as well as adults.
- => I'll set-up (adjust) your instrument so it will play as easily as possible at no charge. I'll teach you basic maintenance, setup, and repair, so you can keep your instrument in top condition (without having to pay a repairman).
