BMW Master Tech -- ASE Certified

15+ years experience

*** 12 Month Warranty on Parts + Labor ***

I know how expensive BMW's are to maintain and fix, I own two older BMW's and I have a passion for seeing BMW's last forever. I am up to date on all the classes up to BMW 7-Series (F01/F02).

When your car is out of warranty there is no need to pay the high dealership fees. I am equipped with the necessary equipment to handle all BMW/Mini's service needs including full programming capabilities.

I'm a bumper to bumper tech. I can do anything the car needs e.g. sunroofs to evaporators, engine services to transmission services, suspension and steering etc. etc. For instance most people cannot do convertible top repairs/ replacements, or have the rear window on Z3's replaced correctly. I can do those items and make it come out like new. Some people are told it needs a new top when it really doesn't. Most people don't know these cars well enough to correctly diagnosis them.

I am also proficient on BMW, Mini, Mercedes, Audi, and VW. I've worked on all these manufacturers and am fully capable of doing anything the vehicle may need.

My expertise is in automotive and advanced vehicle technology systems. I have an extensive background in repairing complex vehicle mechanical and electro-mechanical systems. In addition, I have extensive experience in fiber-optics, testing and troubleshooting electrical and hybrid electrical components, reading and interpreting schematics and blueprints, and Vehicle Condition analysis.

My niche is in applying electrical theory to real-world practical applications to quickly identify, analyze, and provide solutions to electrical and mechanical systems. Using my strong technical background and experience to develop new and creative solutions to complex problems, I have received many awards for outstanding achievement and innovative success.

I have a Bachelor's of Occupational Studies from North Carolina State Technical Institute, where I concentrated on Automotive, Truck and Industrial Technology. I am also a Certified Technician from the BMW Technician Program, and achieved BMW Master status in 2005.

If you want to meet a tech with a desire to educate and fix, then send me an email.
