

Models needed for project shoot (Columbia)

Location

South Carolina

<https://www.genclassifieds.com/x-317366-z>

I am a criminal justice graduate student publishing a thesis on forensic photography as well as a research project on detention center operations. For the forensic photography thesis, I am in need of several models, both male and female for surface anatomy photos (as would be taken at a crime scene and in the lab pre-autopsy). Basically this would require posing in various anatomical positions...not a huge deal other than for a large portion of the shoot it requires various stages of nudity. For the project regarding detention center operations, I need both a female and male model to demonstrate a clothed pat-down search and an unclothed (strip) search as well as the process of applying various inmate restraints (handcuffs, shackles, etc). If interested, the compensation for each project is \$50/hour plus you can have HD copies of the photos if you would like. It will take about 1-2 hours per person to complete the shoot. If interested or for more info, send me a.
