I am professional freelance photographer who shoots weddings in addition to other events/subjects. (I DO NOT do large weddings or functions that require would require multiple photographers or video.) I use a large frame digital Nikon (noted for its detail and low light capabilities), and a bounce flash when necessary. I've worked affairs that were outside, in homes, hotel lobbies, and churches.

I can also bring a portable studio -- lights, gel filters, and seamless paper backdrops if you'd like a more formal photograph of family and friends and the opportunity to offer your guests the chance to have a formal portrait (or just play like a model).

My clients receive ALL the pictures: engagement, pre-ceremony, the wedding and reception. There won't be any logos or business names on the photographs. I usually photoshop the ten or so shots I consider the best, but after you receive the photos, if there are others you'd like edited, I'll photoshop up to 10 more at no extra charge. I will also crop any photo to fit frame/mat size; just let me know, and it's done - no charge; that's forever!

I work on a flat hourly rate for the wedding/event (everything else is included in the price), so, in a sense, you will be able to budget your price by how long you'll need me.

If you compare what you get for the price, I believe you'll find my services to be most economical; if not, let me know, and I'll work with you to fit your price range.

I do have a portfolio of my work if you're interested. And, by the way: Congratulations to you both.
