Professional guitarist/vocalist. I do mostly 1950's-1970's pop and some classic country (600+ songs). I play with an auto accompaniment (basically a drum machine w/bass pedals), use a 'harmonizer' to add harmonies to my vocals, so I have bass, drums, guitar, vocals, and vocal harmonies all going at the same time, hence 'One Man Band'. From easy listening background music to get up and dance, I play clubs, restaurants, private parties, almost any function. .If you need a 'group' sound at a 'single' price or if your space requirements don't allow for a large group, I would appreciate your consideration. I will be happy to send song lists. Respectfully, Joe.
