## Any Job, Large or Small

**BENEFITS:**

- Completely removes stumps
- Hassle free
- No stump, or hole to deal with
- Only byproduct is mulch
- Affordable

## THE PROCESS:

The stump grinder removes a stump by grinding it into small chips WHILE THE STUMP IS STILL IN THE GROUND. This leaves the surface and the surrounding landscape undisturbed. After we clean up each site, we leave the chips in place and spread them around the hole depending on the soil type. For more information on stump grinding, please refer to the following references. This process makes stump grinding a more affordable and feasible way to remove stumps rather than using excavation.
