Soil Amendments/Mulch - \$15 (Rogers)

\$15.00 a YARD.

You can use lawn clippings and leaves as soil amendments or mulch. You can work 2 or 3 inches of clippings into the top 6 inches of soil in your garden. As they decay, they add organic content and nitrogen to the soil. Alternatively, layer about 2 inches of clippings over the root area of a shrub or tree. Mulch is a great garden helper; it moderates the temperature of the soil, holds in moisture, inhibits weeds and adds nutrients to the soil. Because grass clippings break down rapidly, however, you need to replenish the mulch regularly. Call 479- six three six three one five zero for times to.
