The Good: '07 GSXR 750, awesome bike with over \$2k in aftermarket upgrades. Akrapovic Shorty Exhaust, Galfer Stainless Steel Brake Lines, Brembo Monoblock Brakes, Pazzo Adjustable Levers, Vortex Sprockets. The bike has a Clean title as well as a recently renewed registration. Just serviced with all fresh fluids and new sprockets.

The Bad: It has been down once and needs new fairings. Fairings can be purchased on eBay for around \$500. The bike recently started overheating, and I haven't had the time to figure out what the problem is. GSXR forums suggest a bad water pump or thermostat, which are around \$100 for oem parts on eBay. Pretty sure it's a simple fix, but I'm a UC Berkeley student and don't have the time or resources to do it myself while in school.

Asking \$4,500 or best offer. 06-07 750's seem to be going for around 6-7 thousand or more without the upgrades I've installed, so I feel 4500 is a good starting point for negotiations. Will not consider anything under 4000. Partial Trades welcomed. Pics include the bike as it was with fairings and what it looks like now.
