I'm a full time wedding photographer based out of the South Shore of Massachusetts and I have the coolest job on earth! My approach is heavy on narrative storytelling with a big emphasis on modern vintage style. Weddings have always been my main focus because of the raw emotion and overall intensity of the day. I love capturing the soul of my couples rather than recreating the same ol' generic wedding routine. Its a blast fusing narrative with fine art while watching a story unfold before your eyes. My couples are always an emotional investment and many of the folks I've worked with are now dear friends to me. Thats why this is the greatest job on earth and I am super lucky to call this my career. I do not take shot lists and I am not a fan of Pinterest boards. I am a fan of photographing the authenticity of who I'm working with and keeping it personal. Aside from being the camera dude at weddings, I'm also the Husband of a pretty little lady named Jen and the Dad of the 2 cutest little kids of earth: Magnolia & Elliot. My little family and my friends are the most important thing on earth to me and on your wedding day, I see it that way for yours as well. Because at the end of that day, all you have are the memories to relive it. And I am so happy to play that part for you.
