2001 Vw cabrio convertible. Top has no leaks, great quality interior and exterior. Runs and drives great.

Abs light on, can't figure out why. Thinking it's something electrical. Needs someone who can figure out what's wrong, or sticker it as is. Great, fun summer car! Stored for the last two winters since I've owned it. \$1700 obro, will trade for car plus money for something with LOW miles and good on.
