I'm a full time MCAT instructor who has helped many students get great scores and gain admission to medical school.

Many students come to me not truly understanding the science that's tested on the MCAT. Additionally, they don't understand the WAY this science is tested. My goal is to change all that. My goal is to help make you a lot better than your peers who are competing for the limited number of seats. My goal is to turn you into an MCAT master. This can be done.

Together, working hard as a team, we are able to carry your science skills to a high-level. Throughout this time, we can also provide you with a deep knowledge of the test and of the thinking skills which are needed to excel on it.

I teach every area of the test. My purpose will be for this to become the best educational experience that you've ever.
