

Customer Service Web DesignerDeveloper Needed for Local SEO company (SLC)

Location **Utah**
<https://www.genclassifieds.com/x-335204-z>

Hello, I'm Mark and I own a reputable SEO company for 19-years that does not maintain or provide web design or dev projects until now.

Please let me know if you can schedule time for lunch and we can meet to learn more about each others skills and how you to get started with this position.

Please send me your portfolio of sites you've worked on in the past. Hopefully you have 1-3 sites you've built and you have a desire to take on more.

--

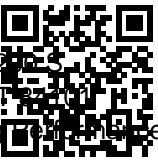

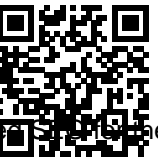

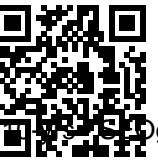

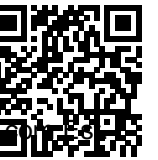

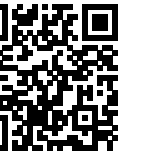

This is not an April Fools joke since I know my offer might sound too good to be true as long as you can fulfill at your end.

My two other active designers/developers are overwhelmed with work for active potential seo projects. The active 45-seo clients also need design and development.

SEO-clients don't always know what they want but I know what they need and that requires teaming up with you. Your title should be: Customer Service Web Designer/Developer

Your services will include improving/building new and existing websites and improving their inbound marketing/content strategies.

Currently, I have a temp office in SLC & permanent office in UT co. I would like to contact you by phone before we meet to ask you questions about customer service since I've hired great designers/developers in the past but lacked the customer development service skills needed to keep up with the pace.

 ~Mark 75 W 2nd SLC, UT Offering a Full Time Basis.
