I have a cat, about 4 years old, who needs medical attention. He has a blocked urinary tract, which can be fatal, he is unable to pee, if it goes on long enough, his kidneys will rupture and he will die a painful death. I can't afford the procedure to have his problem fixed, and neither can I afford to have him put down.

I'm offering him free to whoever would like to take him, granted that you either get him the medical procedure, or you have him put down so that he doesn't die.
