

# WANTED Metal Fabrication services (aurora co)

Location **Colorado**  
<https://www.genclassifieds.com/x-336371-z>

I am looking for someone to fabricate some steel plates for me. They are part of a woodworking/art project.

I am including an image of the 4 plates. The 2 triangular plates each have two 5/16" holes that are 5" apart, and the larger plate also has a curved slot cut in it. There are also several smaller holes.

The other 2 plates each have three 5/16" holes and one also has a curved slot. They also have some smaller holes as well.

The plates will need to be about 11 gauge or slightly thicker. I will provide more exact drawings when needed.

Thank you for your time -
