Move Beyond Auto - Learn to Take Pro Quality Photos

Have you ever wanted to learn to take better pictures but never tried because you thought, (a) you need an expensive camera, or (b) photography is too complicated and hard to learn?

Well, neither A nor B is true. In two hours you can easily learn how to start taking control of your camera and get the photos that will delight you and impress your family and friends.

Using clear, simple terms and hands on practice, I can show you what the "M," "A," "S" (or Tv), and "P" settings are on your camera, what they do and when to use them. With camera in hand, we'll actually try out each mode so you can see first-hand the effect you get from each setting. You'll learn how to control Depth of Field, get the right exposure, along with the basics of composure to deliberately create pictures that "pop."

If this sounds like fun, meet me at a local park or Starbucks for two hours of private lessons in photography! All for only \$20/hr.

To learn more about me, visit my website at www.OceanBodhiPhotography.com.

I look forward to meeting you!

-Bodhi

I can't say enough to thank you for the photography lesson. You were very informative and the skills you taught me were very helpful. Our photos came out fabulous and I can't thank you enough! I can finally take control of my camera and enjoy the maximum potential thanks to you. - Jeanette & Danny
