I have a turn key 1980 Pontiac firebird. It has a rebuilt small block chevy 400 in it with a new 720 CFM 4 barrel carb on it. New shop installed true duel exhaust without any catalytic converters, this car will need a historic car policy or to be registered in a non emission regulated county. It has many new parts to the motor as this is not the original motor. Motor is very strong no knocks. I just put new shocks on all four corners. Turbo 350 transmission was rebuilt a couple months ago by Trail Transmission. Very strong transmission, will chirp the tires shifting into 2nd gear when on the gas. I have receipts for all of the serious work such as the transmission, and exhaust, plus much much more. Body is completely straight, 0 rust. Interior is in good shape, minor repairs needed such as the stereo. Clean and clear title in my name. Originally a gold car as you can see on the bumpers and the deck lid. This car does not need much. Might be interested in a trade for a boat or rock crawler depending on what you have. Formula, trans am camaro, mustang, muscle car, horse power, pony car, sports
