Glow and Go Mobile Sun of Scottsdale is a mobile Spray Tan Company serving all of Scottsdale, AZ and surrounding areas. I am a Board certified cosmetologist, makeup artist, waxing specialist and a certified spray Tan Technician. We are completely mobile and we bring everything you need making your convenience and comfort our main priority!

www.facebook.com/GlowandgoMobilesun

I normally charge \$75 for this but I'm new to the area and only charging \$40 for new clients. I also include an exfoliating treatment, and a prolong kit too!

Included in your package is an exfoliating mitt, a full sized self tanner, a shower gel and an ph balanced spray. My products are organic and the best on the Market!!

Call Jennifer to learn more. Book a customized spray tan today! I will also give a special price for groups of 4 or more or give the host a free spray tan.

Follow these preparation tips before Sunless Tanning:

BEFORE your Sunless Application:

Exfoliate skin at least 3 to 6 hours before your sunless session to smooth skin for even tanning

results. Spend a little extra time on knees, elbows, feet, and hands. We recommend exfoliating with

Body DrenchA® Daily Moisturizer or Body Scrub.

Do not apply any lotions, oils, or perfumes at least 24 hours before your sunless tanning session.

Waxing should be done 1-2 days before your sunless tanning session.

Do not use any tanning beds or tanning products for at least 24 hours prior to your sunless tan. We recommend moisturizing with Body DrenchA® Daily Moisturizer.

Do not apply any lotions, oils, or perfumes at least 24 hours before your sunless tanning session.

Waxing should be done 1-2 days before your sunless tanning session.

Do not use any tanning beds or tanning products for at least 24 hours prior to your sunless tan. We recommend moisturizing with Body DrenchA® Daily Moisturizer.

Do not apply any lotions, oils, or perfumes at least 24 hours before your sunless tanning session.

Waxing should be done 1-2 days before your sunless tanning session.

AFTER Your Sunless Application

- Wait at least 8 to 12 hours after application before you shower. This will allow time for the self-tanning reaction to occur on the skin. If you need to shower sooner let your airbrush technician know before your session and she can custom mix the formula accordingly.
- Don't worry if you see color wash off from your first shower, this is normal. What you see washing off is the immediate cosmetic bronzer and what is left behind is a beautiful sunless tan.
- Do not apply moisturizer until after your first shower, for this could affect the immediate reaction of the sunless solution on the skin and cause streaking. When showering we recommend a high quality body wash such as Norvell® Hydrating Body Wash.
- Do not exercise until after your first shower.
- Moisturize 2-3 times daily, especially after bathing, to maintain your sunless tan. For best results use a water based moisturizer. Don't use oil based moisturizers, they can cause blotchiness.
- Do not apply moisturizer until AFTER your first shower, for this could affect the immediate reaction of the sunless solution on the skin and cause streaking. When showering we recommend a high quality body wash such as Norvell® Hydrating Body Wash.
- To help extend your tan we recommend Norvell® Prolong Tan Extender.
- Do not exfoliate skin for at least 48 hours after your sunless tanning application. When you do exfoliate, do so gently and evenly with Norvell® Moisturizing Body Scrub to preserve an even sunless tan.
