Price

? Trial class is available for only \$20;

? Hourly rate is low and negotiable;

The following is what we heard from our customers:

Harry was extremely helpful when I had trouble with my College Pre-Calculus Class. He approached everything intuitively rather than cramming a bunch of formulas for me to memorize. I strongly recommend him for help with calculus and trigonometry especially.

--- Kate S.

Mr. K. taught my son middle school & high school math. This was not an easy task. My son has difficulty focusing. He would lose interest easily. Mr. K. was able to stimulate him and give him the confidence he needed to succeed. His teaching techniques were compatible with my sons needs. He also mentored my son and which helped his see his own value. I highly recommend Mr. K.!
