Hi,

I'm Liz with UserTesting, a user research company, and our client is looking for feedback on their website from people in the lighting industry (whether you design lights or install them as part of your job).

We're looking for feedback from the following people:

- People who do lighting installation / rigging (can be part of maintenance / technical crew job)
- Lighting engineers; technical specifiers
- Lighting designers; creative specifiers
- Lighting architects

We're offering \$60 for 30 minutes of your time. The study is done online, on the UserTesting platform, online, and can be done in your own free time. It should be interesting!

If interested, please respond with your:

1. Name
2. Contact email
3. Job title / role
4. LinkedIn profile, personal site, or company
