

# Missing Female Beagle Dog

Location

**California**<https://www.genclassifieds.com/x-370431-z>

Our older female beagle disappeared from our Torrance backyard on either July 10th night or July 11th morning. She was wearing a collar and harness and had 2 ID tags on her, but any of those could be gone by now. She weighed about 23 pounds with short fur and typical beagle coloring of black, brown, white, and tan. She's not spayed. We have reason to believe she might have been sold or given to someone, so she could be far away from Torrance. When she disappeared, she was being treated for a serious illness and requires medication 3 times per day. We're offering a cash reward for her safe return, no questions asked. Please contact us if you think you've seen her. Thank
