If you need to have your laptop, PC or mini system powered on (This is very important.) we will have our technicians at the store to make sure the power is on and the system is working. We just need to know the make and model of the system (unless it is a micro or mini system that has a specific adapter.)  
 We will need the password for each user if you have one.  
 Complete information about the problems and/or issues you may be having.

We will give you an estimate of the total cost to repair your PC/Laptop and an estimate of time for completion. Once the PC/Laptop is complete; we call you and let you know that your system is ready to be picked up. Simple.

---
