- 
4. we examine it for errors, problems, and functional issues.
  5. discuss repair options that you are comfortable with.
  6. once the repairs are accepted, the repair begins the same day.

What we will need:

1. if it is a laptop, we will need the power adapter. (This is very important.)  
(all laptops have different adapters according to the make, model, and manufacturer)
2. If your system is a PC, then we just need the box itself, no cords.  
(unless it is a micro or mini system that has a specific adapter.)
3. we will need the passwords for each user(s).
4. Complete information about the problems and/or issues you may be having.

We will give you an estimate of the total cost to repair your PC/Laptop and an estimated time for completion. Once the PC/Laptop is complete; we call you and let you know that your system is ready to be picked up.

**\*\* Simple, and faster than most places take to look at a system \*\***
