I have 2 videos on foaling horses by Dr. Robert Miller. For those who don't know, he is the one that really convinced the world that imprinting on new born foals really made a difference on their behavior for the rest of their lives. The first is called Foaling Fundamentals. The 2nd is called Early Learning and covers how to correctly imprint your foals. Note that if done incorrectly, it can also mess up your foals! So the video is a great help! :D
