

# EnerPAC Hydraulic Torque Wrench Power Unit (3600,- USD)

Location **Montana**  
<https://www.genclassifieds.com/x-372139-z>

New from Grainger, this unit is almost \$5500 and on the internet they are around \$5000.

This unit works good, has low use - hardly shows signs of use - and is extremely clean.

This is the power unit only - it does not come with the torque wrench.

This is a 115 volt unit. It is adjustable up to a maximum of 11,600 psi. It is about 53 pounds. It has double acting control for extend and retract or tighten and loosen on a torque wrench. It has remote pendant operation.

I am downsizing and do not need this unit any more.

This is a PMU-10427 Unit. It is a portable electric driven pump.

It is a powerful two-speed pump and is lightweight and easy to carry.

The standard heat exchanger package keeps the pump cool under extreme use.

It has a glycerine filled gauge with scales reading in psi and bar.

This universal motor is for a high power to weight ratio.

This is a full power unit with a little adjustment of the rated pressure.

This is a pump unit with a pressure control valve for torque and pressure and pressure repeatability.

You will get a like new power pump for considerably less than the new ones are going for.

It includes the Repair Parts Sheet, the Instruction Sheet, and the original color sales brochure.
