Guitarist singer looking to play to wait staff and 2 drunk guys who recognize some of the material.
Who needs patrons? Who needs people dancing on the dance floor? I want to satisfy my personal music tastes at 6,000 watts because I am the only one who matters!
Seeking like minded egotistical players who want to play obscure music that no one but us has heard of!

Why? Because we can!

Let's torture some bar staff. Let's watch people stream out the doors like rats abandoning a sinking ship!

There is a ton of local bars and nightclubs around. We do not need return gigs we can change our band name every week to keep em guessing.

Lets do this!
