Hello, I am looking for a home for an approx. 4-6 year old tabby who was either dropped off, or was lost and made his way over to a colony of feral's I take care of near my home. He is not feral was scared to death, and so afraid of the other cats that he would hide in the freezing cold, then come running to me went to feed the others. I finally took him to my home where it was warm, I had him vetted and vaccinated. I cannot keep him, and although I have contacted the local animal hospitals and animal control, no one has reported him missing. He is neutered, a handsome, quiet cat that just wants a home and someone who will love him. Please contact me for any further information or pictures. Thank.
