

Porch Roof Install (Brunswick)

Location

Ohio

<https://www.genclassifieds.com/x-373191-z>

I am looking for quotes from contractors which have installed porch roofs in the past and have photos and references.

The install will be approximately 5 feet x 14 feet, with the pitch matching the existing homes roof. I will need a gutter and the gutter will need tied into a downspout which is close to where the roof will be. There is stone which will need to removed so the roof can attach the home. Some stone will need to re installed after the flashing is installed. I would like the project completed the first or second week of May. The based for the porch will be composite decking and will be done prior to the roof install. I will be placing and order for material this weekend and can add material for the roof install so everything is here when you start the.
