True Prep Table model TPP-93D-4. Table is in very good working order. There are some drawer and door gaskets that need replacing and cosmetically there are little dimples on the top underneath the cutting board as we didn't use the cutting board but put grates directly on top which made the dimples. The drawers save a lot of effort by eliminating a lot of bending/reaching to get ingredients. Just open the drawers and everything is there. It also has the one door at the end for bigger items. Be sure to check the exact model number if you are comparing this to other tables as the drawer option is an upgrade and is more expensive than "door only " models. Asking \$2400 or best offer. These can run as high as \$7200 new. Call, email, or text with any questions. Thanks. Scott
