

KITTYDOGGYPET DOORBELL (New Berlin)

Location

Wisconsin
<https://www.genclassifieds.com/x-373966-z>

Do you have a cat or dog that likes to experience the great outdoors, as all kitties do? NOW....there's an easy way to know when your little feline wants to come back indoors!

This handy alert system consists of a motion-activated sensor and an indoor chime. When your kitty shows up at the door, his movement will trigger the chime to get you running to the door to welcome him in!

Unlike other solutions out there, he doesn't have to "learn" anything to make it work! And....he has to pass your visual inspection before entering! (Pet doors let in, not only your kitty, but - to your horror - also whatever "prize" he's eagerly bringing to you!)

This 2-piece system runs on one 9V and three C batteries, not included.
\$45.00

cat dog
