## PREMIRE WALL MOUNT COFFEE GRINDER -

This one very nice, and has original catch glass - more valuable than teh grinder itself ... works fine and notice the wooden crank handle has no cracks in it - complete but for cardboard disk that was in teh interior of teh screw on top [ crumbled ] and who want cardboard in your coffee ?

i bought this in 1973, used it a few years until the grinding noise [ a joyful noise ] drew complaints from spouse early in the morning ..... has been in my attic since 1978 price = \$ 350.00 cash - pickup

-line in photo of catch glass bottom is not a crack - this is typical of these and is a mould .
