Do you like jazz music (United States)

Female vocalist seeks accompaniment in early jazz and blues tunes for street gigs, open mics, etc. I've been singing for a while, but not as seriously as I'd like to be. Also sang harmony with another gal in a band before. I'm somewhat new to town as well. So I'm looking to cut my teeth at performing and just get out there in general. I'm relatively new to the technical side of music (I really just know a lot of songs), but what I lack in experience, I make up for with enthusiasm, lack of ego and a good ear. Just looking for a cool person to play and explore music with. Whaddaya say?
